

# CQG Trader System Specifications

**January 2009 | Maximize your CQG experience**

CQG Trader is the perfect execution platform for quickly viewing market activity, placing orders, and tracing orders and positions. To help you maximize your CQG experience, we provide both required and recommended system specifications for running CQG Trader.

## Required and Recommended Specifications

	Required	Recommended
<b>Processor</b>	Intel® Pentium® 4 3.0 Ghz	Dual-Core. Intel Core™ 2 Duo (2.33 Ghz or better)
<b>Memory</b>	1GB RAM	2GB RAM
<b>Hard Drive</b>	7200RPM with at least 1GB of free hard disk space	7200RPM with at least 4GB of free hard disk space
<b>Video Card</b>	128Mb of memory (If multi-monitor, 128Mb per video card)	128Mb of memory (If multi-monitor, 128Mb per video card)

## System Setting Requirements

Hibernate and stand by modes cannot be used on a system running CQG Trader. Hard drive power-saving features should also be disabled. Please note that Microsoft Windows® 2000 is no longer supported.

## Internet Access

CQG Trader requires Internet service via a high-speed connection, such as DSL, cable, or fixed wireless/wireless local loop (WLL). Wireless Internet connections are not recommended, especially broadband over a WiFi card. Dial-up is not supported.

## Monitor Setups

These specifications are appropriate for single and dual monitor setups. If you have three or four monitors, you will need a higher performance processor, video card, and network connection.
